## 1. Qualitative information on quarterly financial results

## (1) Explanation of operating results

[Outline of the first three months of the fiscal year]

The overall world economy during the first quarter of the current consolidated fiscal year continued its ongoing moderate recovery. However, the future outlook for places such as China and other emerging market economies in Asia, as well as developments in and effects of U.S. government policies, etc., continue to be uncertain.

Meanwhile, the overall Japanese economy kept on its moderate recovery track as corporate business results and the employment situation improved.

Under such circumstances, the Company Group has been working on improving operating results by operating two main businesses: the Asian Food Global Business, that distributes Asian food products and ingredients such as Japanese food around the world with a focus on North America, as well as in Europe, China, South East Asia, Australia, etc., and Agricultural & Seafood Products Trading Business, that distributes fruits and vegetables, fishery products, etc., with a focus on domestic markets, as well as in China, South East Asia, etc.

With regard to the Asian Food Global Business, in addition to the growth in the North American region, the Company Group has been aggressively developing markets, setting the strengthening of business bases in other regions as one of the Company Group's growth strategies. As for the Agricultural & Seafood Products Trading Business, in addition to the wholesale market, which is the main distribution route, the Company Group has been working on developing other distribution routes (mass retailers, restaurant chains, home-meal replacement industries, etc.) and overseas distribution routes (export of domestic fruits and vegetables, offshore trading in fruits and vegetables, wholesale business in China, etc.).

As a result, with respect to the financial results for the first quarter of the current consolidated fiscal year, net sales stood at 42,815 million yen, operating income amounted to 1,647 million yen, ordinary income amounted to 1,535 million yen, and profit attributable to owners of parent totaled 1,118 million yen.

Financial results by segment are as follows: It is noted that net sales of segments are net sales to external customers.

#### [Outline of operating results by segment]

### (i) Asian Food Global Business

In the Asian Food Global Business, net sales stood at 29,866 million yen and operating income amounted to 1,333 million yen for the first three months of the fiscal year.

Although net sales in the North American region grew steadily, selling, general and administrative expenses increased because expenses in the logistics department, etc., such as personnel expenses have been rising since the previous consolidated fiscal year. In the North American region, the Company Group will further strengthen and accelerate the structural reform (improvement in the profit margin and reduction in logistics expenses) that has been promoted, as well as making efforts to improve profitability.

In other regions, since the development of new customers and the boosting of existing customers have been steadily progressing, the business base has been strengthening.

## (ii) Agricultural & Seafood Products Trading Business

In the Agricultural & Seafood Products Trading Business, net sales stood at 11,801 million yen and operating income amounted to 260 million yen for the first three months of the fiscal year.

With regard to net sales, the sales of fruits and vegetables to domestic wholesale markets, mass retailers, restaurant chains and home-meal replacement industries grew steadily. As for overseas distribution routes, the sales of avocado, small apples, etc., grew steadily. Income increased because the sales of citrus and tropical commodities in domestic markets, which have experienced difficulties in the same period a year ago, recovered and grew in the current period.

# (iii) Other businesses

In respect to the financial results for the first quarter of the current consolidated fiscal year, net sales stood at 1,147 million yen and operating income amounted to 77 million yen due to an increase in sales of products in domestic markets, including products for Valentine's Day and White Day.

(Note) Since the Company did not prepare quarterly consolidated financial statements for the first three months of the fiscal year ended December 31, 2017, an analysis was not performed compared to the same period in the previous fiscal year.
